

NAME OF DISTT = JASHPUR
NAME OF BLOCK = KANSABEL
NO OF GRAM PANCHAYAT = 36
NO OF SPLITTERS = 11
NO OF OLT = 01

SPPLITTER 2 is used only for splitting 1F in 4 to 4 SF

- (1) 1st SF of S2 goes to S3 where it again splitted in 2 to 2SF
1st SSF goes to kusumal & 2nd SSF goes to Chirada
hence loss for kusumal & Chirada $= 7.5 \times 11 = 3.5 \times 11$ for each
- (2) 2nd SF of S2 goes to S4 where it again splitted in 2 to 2SF
1st SSF goes to khumbara & 2nd SSF goes to Bataleika
hence loss for khumbara & bataleika $= 7.5 \times (3.5) = 3.5 \times 11$ for each
- (3) 3rd SF of S2 directly goes to Nalukal hence loss for this is only $= 7.5$
- (4) 4th SF of S2 also directly goes Sajapam hence loss for this is only $= 7.5$

[illegible]
